

Every Class At TR Visits Drumheller

Since the beginning of January, EVERY class at TR has had the opportunity to go on a **virtual field trip** to Drumheller, Alberta, where they have visited The Royal Tyrrell Museum of Paleontology. This **video conference** experience was totally interactive, which means that students could be seen and heard by the presenter. Students were asked questions by the presenter and the presenter also answered questions asked by the students.

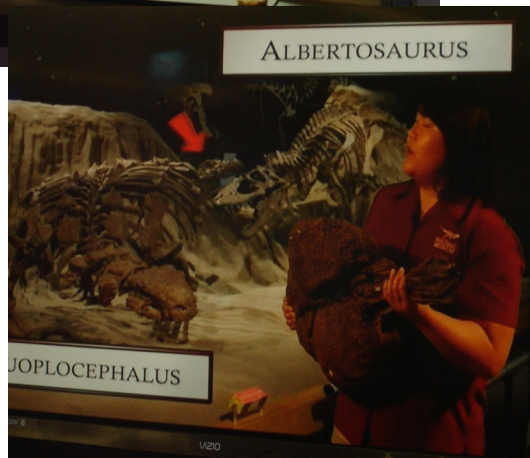

Everyone learned about ancient life, including dinosaurs and how fossils are formed. What made this experience so incredible was

that each video conference was different and unique for each class, based on specific outcomes for that particular Grade level.

The tour of the museum was a highlight for every class!

Ask any student at Terrace Ridge if they enjoyed this experience and you will be met with a resounding "YES!"
